

# Desire2Learn/D2L - How to add an InQuizitive link with LMS Integration

## a) Add InQuizitive as external tool and create a link

1. Login to your LMS with your instructor account and navigate to your course's homepage.
2. From the **User** menu or the toolbar, select the **Edit Course** command.
3. Click the **External Learning Tools** link in the Site Resources section.
4. Click the **New Link** button. Name the link "**InQuizitive**" and in the **URL** field, enter the URL provided by your Norton representative.

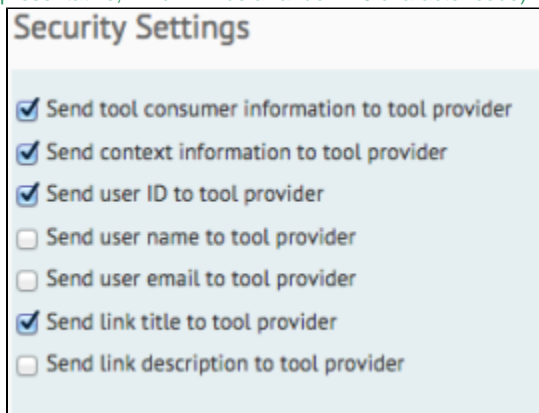

If you're using an InQuizitive "launch page," the URL will look like:

**https://ncia.wwnorton.com/inquizitive\_BOOKCODE**, where BOOKCODE is replaced with the code for the book you are using.

If you're adding a direct link to an InQuizitive activity, the URL will look like:

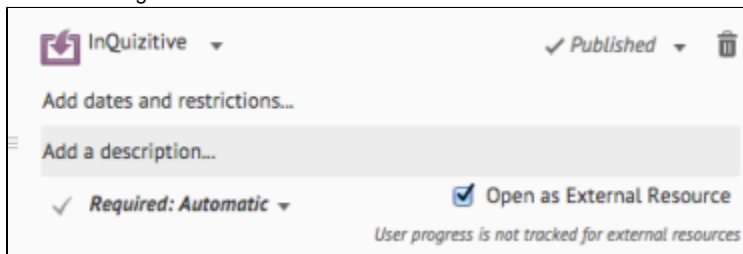

**https://ncia.wwnorton.com/NNNN**, where NNNN is replaced by the 4-digit number for the InQuizitive activity.

5. In the **Key/Secret** section, make sure:
  - The **Sign messages with key/secret** box is checked.
  - If your Norton contact has told you that we've worked with your campus IT department to enable integration, select the **Tool consumer key/secret** radio button.
  - If you're not sure whether we've worked with your campus IT department, select the **Link key/secret** radio button and enter the key and secret below:
    - Key: (copy and paste the Consumer Key provided by your Norton representative, which will look like "yourschooledu")
    - Secret: (copy and paste the Secret provided by your Norton representative, which will be a random 10 character code)
6. In **Security Settings** section, make sure these checkboxes are checked:
  - Send tool consumer information to tool provider
  - Send context information to tool provider
  - Send user ID to tool provider
  - Send link title to tool provider(Remaining boxes can be ignored)

7. Click **Save**.
8. In the **Materials** menu or the toolbar of your course, choose **Content**. In the desired module, click on **Add Existing Activities** and choose **External Learning Tools**
9. Select **InQuizitive** from the pop-up window and the item will be added to your course.
10. Click the drop-down menu next to the InQuizitive item's title and select **Edit Properties In-place**.

11. Make the **Open as External Resource** checkbox is checked. This change will be auto-saved.
12. Open the module containing the link you just created and click the "InQuizitive" link, which will launch InQuizitive in a new browser tab.
13. You'll be prompted to **sign in or register**. If you have a Norton account, please use the associated email address and password to sign in. Otherwise, use the "No, I need to register..." option and register using your school email address.

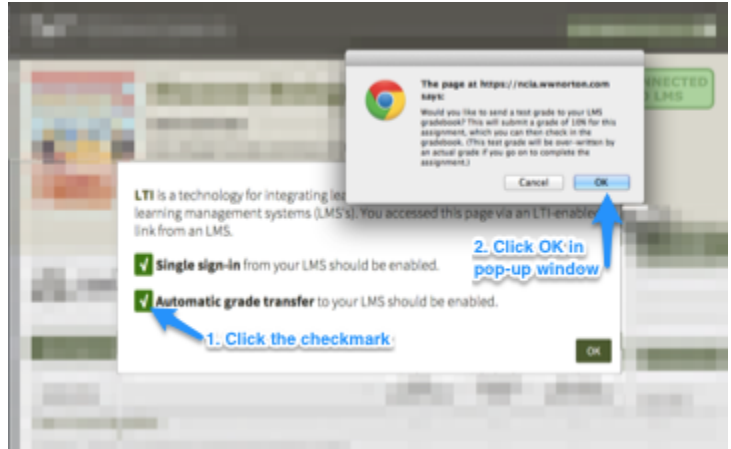

14. After successfully signing in or registering, **close the tab with the InQuizitive page**.
15. In the future, to access InQuizitive, always use the link from your course, and you will be automatically signed in. (You can confirm this by looking for your school email address in the upper right of the InQuizitive page.) You will then be able to review student results and

manage activity settings.

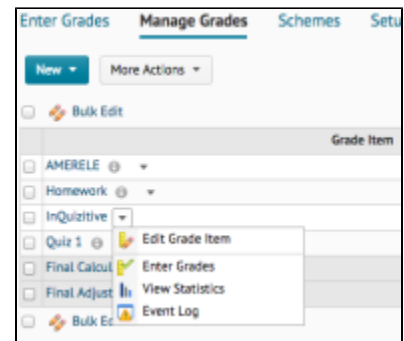

## b) Test InQuizitive integration

1. From your D2L course, switch to student view (using your D2L account menu in the upper right and selecting **View as Student**) or log in to a test student account.
2. Navigate into the course to locate the link to **InQuizitive** you just created and click it.
3. The InQuizitive launch page or specific activity for the book you're using will open in a new browser tab. You should be automatically signed in under your Norton instructor account, although InQuizitive will present the student view of the system.
4. On the InQuizitive page, confirm that you see a green badge labeled "Connected to LMS". If instead you see a red "LMS CONNECTION NOT MADE" badge, skip to *Reporting error messages* below.
5. Click anywhere in the **Connected to LMS** badge and an explanatory box will appear over the page.
6. If you see a red "X" next to "Single sign-in" or "Automatic grade transfer," skip to *Reporting error messages* below. If you see a yellow "?" next to "Automatic grade transfer," close the InQuizitive tab in your browser and reconfirm that you launched the link from your LMS in student view or using a student account.
7. Click on the green checkmark icon next to **Automatic grade transfer**.
8. Click **OK** in the confirmation message pop-up window to send a grade.
9. Confirm that a "Test Successful" message appeared below Automatic Grade Transfer.
10. Switch back to the browser tab with your course and verify the grade of 10% appears for the InQuizitive activity in the student's grades page in your LMS.
11. If you did not see a "Test Successful" message, or the grade did not appear in the student's grades, skip to *Reporting error messages* below.
12. Close the browser tab with the InQuizitive launch page.
13. You should now exit student view or log out of the student account. The link is ready for use by your students. See "Next steps," below, for additional instructor suggestions.

## c) Next steps

1. By default, D2L creates a column in your gradebook for InQuizitive when the first grade is sent (which you will have done in "Test InQuizitive Integration," above). The default point value for the item is 100. Take a moment to review the points and other settings for this grade by using the **Grades** link in D2L, then clicking **Manage Grades**. Click the small triangle next to the InQuizitive item and select **Edit Grade Item**. Review the settings and click **Save and Close** if you make any changes.
2. If you're **not** using the InQuizitive launch page, but rather adding multiple InQuizitive activities directly to your course, repeat section (a) above as needed for each specific activity's URL, as well as updating each item's grading policy. It's not necessary to perform the grade transfer test for each additional link you create.

## d) Reporting error messages

1. Copy the text from any error message box or take a screenshot and send it to John Kresse (jkresse@wnnorton.com) and Judd Volino (jvolino@wnnorton.com). One of them will contact you to assist with further troubleshooting.
